

Classmate Interview

My partner, Iris Margarita Andino Sepúlveda (on the right side of the photo) is a 20 years old student of Microbiology at the University of Puerto Rico in Humacao. Iris was born on December 18, 1998 just like me; I found a twin. She is nice and humble. She loves animals, she has had many. She lives in Yabucoa and wishes to be a generalist cardiologist. She likes to sing and is part of the choir of her church. She likes to have good mental health and she always works in that aspect. Her favorite color is violet and she likes to eat pasta. It was good to meet her because we have many interests in common.
